

Arizona Nutritional Supplements Adopts Vitature™ Dietary Supplement Compliance Management Solution

September 14, 2017 | Portland, Oregon – Healthnotes®, a leader in providing consumer education for the dietary supplement industry, announces today that Arizona Nutritional Supplements (ANS) is adopting Vitature™, their cloud-based raw material compliance platform. While already working with many of the top suppliers in the industry, partnering with Healthnotes allows ANS to better qualify suppliers and source raw materials, as well as centralize regulatory compliance data and documentation.

Founded in 1996, ANS is a privately held company created to bring a higher level of quality and service to contract and private-label manufacturing. Today, ANS serves some of the industry's largest and most respected customers around the world.

Their state-of-the-art, environmentally friendly facilities in Chandler, Arizona exceed cGMP standards and allow them to grow in anticipation of customers' needs. With over 350,000 square feet of production and warehousing space, as well as continued expansion plans, ANS brings product vision to market.

“As a contract manufacturer, having a central repository with automated workflow to manage our raw material compliance documentation and collaboration with suppliers will greatly improve our ability to serve our customers, and improve our regulatory audit preparation,” says Tom Dubinski, Vice President of Quality Systems at ANS.

“We're pleased to be working with a company like ANS who has earned some of the industry's top certifications for their best practices in manufacturing, packaging, and distribution and their continued focus on transparency,” says Dr. Skye Lininger, CEO of Healthnotes. “We appreciate ANS's commitment to leverage Vitature and the efficiencies it brings in supporting a more transparent supply chain.”

About Healthnotes®

Healthnotes Inc., provides solutions for the dietary supplement industry via Vitature™ and its Aisle7™ products. For over 20 years, our solutions have been used in retail stores and online for training, consumer decision support, regulatory compliance, and product development.

Vitature is the cloud-based platform that digitizes and standardizes the data, documentation, and processes needed for material compliance, eliminating regulatory risk for manufacturers and suppliers and speeding up their time-to-market.

About Arizona Nutritional Supplements

Arizona Nutritional Supplements (ANS) is a full service, cGMP-certified contract manufacturer of specialty nutritional and dietary supplements. Founded on the values of integrity, quality, and service, ANS has been a leader in transparency and compliance within the dietary supplement industry since its founding in 1996.

ANS produces powders, tablets, and capsules, and offers an array of primary and secondary packaging solutions across multiple discreet production facilities. ANS also provides innovation and R&D of new products and existing formulations in its state-of-the-art laboratory facilities in Arizona, as well as full in-house QA services for microbial and analytical testing.
